Qadvanced Roller Shade
Gen 3
Programming Instructions

**IMPORTANT**

Read and understand each section before performing required steps

During FIRST TIME SETUP after Step 3, TUG, a remote must be paired to the shade within 90 seconds. Otherwise, the shade will time-out and require a Special Learn Command (Pg. 1) to pair a new remote. JOG is a short up and down movement. Channel number is indicated on the remote by a single green LED. The “ALL” channel (all 5 green LEDs illuminated) follows Channel 5 in the selection sequence. Shade will only respond to learned channel, or “ALL” channel.

**FIRST TIME SETUP**
1. INSTALL SHADE following appropriate instructions
2. PRESS and RELEASE the CHANNEL button to select a channel (1-5)
   (Skip channel selection for Single-Channel Remotes)
3. TUG the HEMBAR 6-10 inches (Shade will JOG in response)
4. Use a paperclip to PRESS the PROGRAM button on the back of the remote
   (The Channel LEDs will scroll back and forth when in program mode)
5. PRESS and RELEASE the UP button
   (Shade will JOG, move to Upper Limit Position, then JOG again)

**SETTING LOWER LIMIT**
1. PRESS and RELEASE the DOWN button
   (Shade will move to current Lower Limit Position)
2. PRESS and HOLD the DOWN button until shade JOGS
3. TUG the HEMBAR 6-10 inches (Shade will JOG in response)
4. ADJUST shade to desired Lower Limit
   (The DOWN button is disabled while setting the Lower Limit, adjust by pressing the UP button or manually roll shade by hand)
5. PRESS and HOLD the DOWN button until shade JOGS

**Use Special Learn Command when:**
- The shade times-out without being paired to a remote.
- A paired remote is not being used or available
- Adding a second remote to the shade

**SPECIAL LEARN COMMAND**
(Shade must be at Upper Limit Position - manually roll shade up by hand if necessary)
*All shades in the upper limit position will respond to the Special Learn Command

1. Use a paperclip to PRESS the PROGRAM button on the back of the remote
   (The channel LEDs will scroll back and forth when in program mode)
2. PRESS and HOLD the CHANNEL button until the shade moves-shade will travel to 75% position
3. TUG the HEMBAR 6-10 inches
   (The shade will JOG in response)
4. Put remote on desired channel shade is to be learned to
5. Use a paperclip to PRESS the PROGRAM button on the back of the remote
   (The channel LEDs will scroll back and forth when in program mode)
6. PRESS and RELEASE the UP button
   (Shade will JOG, move to Upper Limit Position, then JOG again)
IMPORTANT

Lower Limit Position must be set prior to using the PRESET positions (20%, 40%, 60%, 80%). These positions are based on the Lower Limit Position of the shade. When learning new positions, the button currently being programmed (after Step 3. TUG) will not send commands to the shade. After Step 5 all buttons resume full functionality.

Example 1: When learning a new Upper Limit Position, the UP button is semi-disable. Only by pressing the UP button 3 times will the shade move to the up position (or manually roll the shade up by hand).

Example 2: When learning a new Lower Limit Position, the DOWN button is disabled. The shade can still be adjusted using the UP button (or manually roll the shade by hand).

SETTING UPPER LIMIT/ LEARNING A NEW POSITION
1. PRESS and RELEASE the (UP or PRESET) button that will be programmed
   (Shade will move to selected position)
2. PRESS and HOLD the same (UP or PRESET) button UNTIL the shade JOGS
3. TUG shade 6-10 inches (Shade will JOG in response)
4. ADJUST shade to desired position (Manually roll shade by hand if necessary)
5. PRESS and HOLD the same (UP or PRESET) button (Shade will JOG when learned)

DELETE / UNLEARN A REMOTE (or Channel)
(Shade must be at Upper Limit)
1. PRESS and RELEASE the CHANNEL button to select the channel currently paired to the shade
   (Skip channel selection for Single-Channel Remotes)
2. Use a paperclip to PRESS the PROGRAM button on back of the remote
   (The channel LEDs will scroll back and forth when in program mode)
3. PRESS and HOLD the UP button until Shade moves downward
4. TUG the shade 6-10 inches (Shade will JOG in response)
5. Use a paperclip to PRESS the PROGRAM button on back of the remote
   (The channel LEDs will scroll back and forth when in program mode)
6. PRESS the DOWN button
   (Shade will JOG, move to Upper Limit Position, then JOG again)

IMPORTANT

To expose the battery cover, TUG shade past the lower limit-shade will travel up to 75%. Then UNROLL shade down to expose battery cover.

Once batteries are replaced, shade will travel UP on its own after _ seconds. Stopping the shade while it attempts to roll up will cause it to reset its upper limit to the position it has stopped at. To reset Upper limit to normal, perform power cycle by removing one battery for 30 seconds and replacing, then letting shade roll up on it’s own.

BATTERY REPLACEMENT
1. PRESS and RELEASE the DOWN button (Shade will move to Lower Limit Position)
2. UNROLL the FABRIC ROLL TUBE to expose the battery cover (See IMPORTANT information above)
3. REMOVE battery cover
4. REPLACE with new NEW D-CELL or AA Alkaline batteries
5. REPLACE battery cover (Shade will now respond to remote commands)
6. PRESS and RELEASE the UP button to roll fabric back onto the tube

FACTORY (MASTER) RESET (Will remove ALL paired remotes)
(Shade at Upper Limit Position)
1. Use a paperclip to PRESS the PROGRAM button on back of the remote
   (The channel LEDs will scroll back and forth when in program mode)
2. PRESS and HOLD the DOWN button UNTIL the shade moves downward and JOGs
3. TUG the shade 6-10 inches (Shade will JOG in response)
